

# OKS 217

## High-temperature paste, high purity

**For the assembly lubrication of screw threaded connections that are subjected to high temperatures and corrosive influences in chemically aggressive environments.**

Sales Information – January 07

### OKS 217 Fields of use are screw connections at

- Gas and steam turbines in power stations
- Combustion engines
- Flanges and fittings of steam lines
- Exhaust pipes and combustion chambers

### OKS 217 Advantages and benefits

- Prevents seizing and binding of screw threaded connections
- Separates up to 1400°C
- Does not react with metal surfaces
- Prevents material changes
- Suitable for V2A and V4A steels
- Low content of metal and alloys
- Free of sulphides, chlorides and fluorides

### **OKS 217 Packaging and order data**

- 250 g brush tin Article No.: 0217030
- 1 kg tin Article No.: 0217034
- 5 kg hobcock Article No.: 0217050
- 25 kg hobcock Article No.: 0217062

**Speciality Lubricants  
Maintenance Products**
